

Driving Compliance and Revenue Through RINs Management

JDC Group is committed to helping your organization navigate the complexities of RINs regulations while unlocking the full potential of your RINs credits.

Opportunity

The Renewable Fuel Standards 2 (RFS2) regulations were established to help reduce greenhouse gas emissions by encouraging the use of biofuels. Renewable Identification Numbers (RINs) track compliance with these RFS2 regulations. This has placed increased pressure on downstream energy providers to blend renewable fuels into traditional carbon-based fuels. RINs are credit units created by renewable fuel providers and utilized by refiners, importers, and blenders. As a result, RINs have become both a compliance tool and a valuable asset, offering organizations the potential to not only meet regulatory requirements but also to generate new revenue streams.

Solution

JDC Group has developed a comprehensive solution leveraging SAP S/4 and Business Technology Platform (BTP) to address the RINs requirements of most organizations. Our solution is designed to simplify and enhance RINs management, ensuring compliance and maximizing the value of your RINs credits.

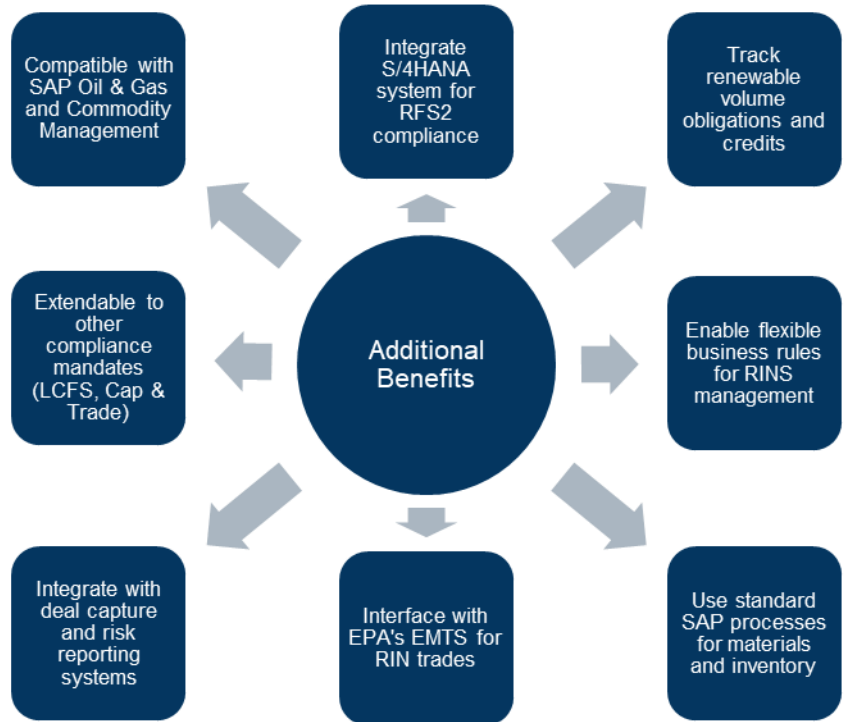

Key Features

- **Renewables Workplace:** A centralized platform for managing all renewable fuel activities.
- **Obligation / Credit Calculation:** Automated calculations to determine RINs obligations and credits.
- **RINs Capture and Reconciliation:** Seamless tracking and reconciliation of RINs credits.
- **Integration with EMTS:** Direct integration with the EPA's Moderated Transaction System for efficient report filing.
- **EMTS Report Filing:** Streamlined and compliant report filing to meet regulatory requirements.
- **Inventory Management:** Robust tools for managing your RINs inventory and optimizing usage.

Key Benefits

- **Compliance:** Stay ahead of ever-changing EPA RFS2 regulations with a solution designed to ensure compliance.
- **Optimization:** Track and manage RINs credits to maximize their value, whether used internally or traded on the marketplace.
- **Revenue Generation:** Unlock new revenue streams by efficiently managing and monetizing your RINs credits.
- **ESG Alignment:** Provide tangible outcomes to support your Environmental, Social, and Governance (ESG) strategies, enhancing your organization's sustainability efforts.

About JDC Group

JDC Group, a Consulting Solutions company, is a premier SAP consulting and strategic advisory firm helping businesses accelerate digital transformation and achieve operational excellence. As one of North America's fastest-growing SAP partners, JDC Group delivers specialized expertise in SAP S/4HANA, Business Technology Platform (BTP), cloud-first strategies, and intelligent ERP solutions. From advisory and implementation to support and staffing, JDC Group empowers clients to modernize their enterprise systems, optimize processes, and scale for sustained growth in a data-driven world.
